REHABILITATION AND EXTENSION OF THE BRUJAS AVENUE AND ANDREWS BLVD. (PANAMA PACIFIC AVENUE)

PROJECT TYPE

ROAD

PROJECT COST

B/. 25, 545,000.00 (First 4 Stages)

PROJECT STRUCTURE

- 1st stage bidding on 2016.
- 2nd stage bidding on 2017.

Project Summary

It involves the rehabilitation and expansion to four lanes of about 5 km from the Brujas Avenue and Andrews Boulevard, to provide a high capacity access to the Panama Pacifico Area due to the traffic increase projected by the Master Development Plan because of all the housing and commercial projects in the area, connecting it with Pan-American Highway, between Panama-Arraijan at the North, and Veracruz route to the South. The project consists of 4 stages to be developed in the next four years, starting in 2016. After, there will be a 5th stage where it will be extended to six lanes from the entrance of the Pan-American Highway to the entrance of the Andrews Boulevard.

Scheduled Dates: month, year

Projected Bidding Date: June, 2016 (1st Stage).

Projected Work Starting Date: October, 2016 (1st Stage).

Projected Work Finish Date: August, 2017 (1st Stage).

CONSTRUCTION OF FIRST PHASE OF THE NEW WASTEWATER TREATMENT PLANT AND REHABILITATION OF PUMPING STATIONS

PROJECT TYPE

WASTEWATER TREATMENT PLANT

PROJECT COST

B/. 22, 854,536.00

PROJECT STRUCTURE

Construction Bidding.

Project Summary

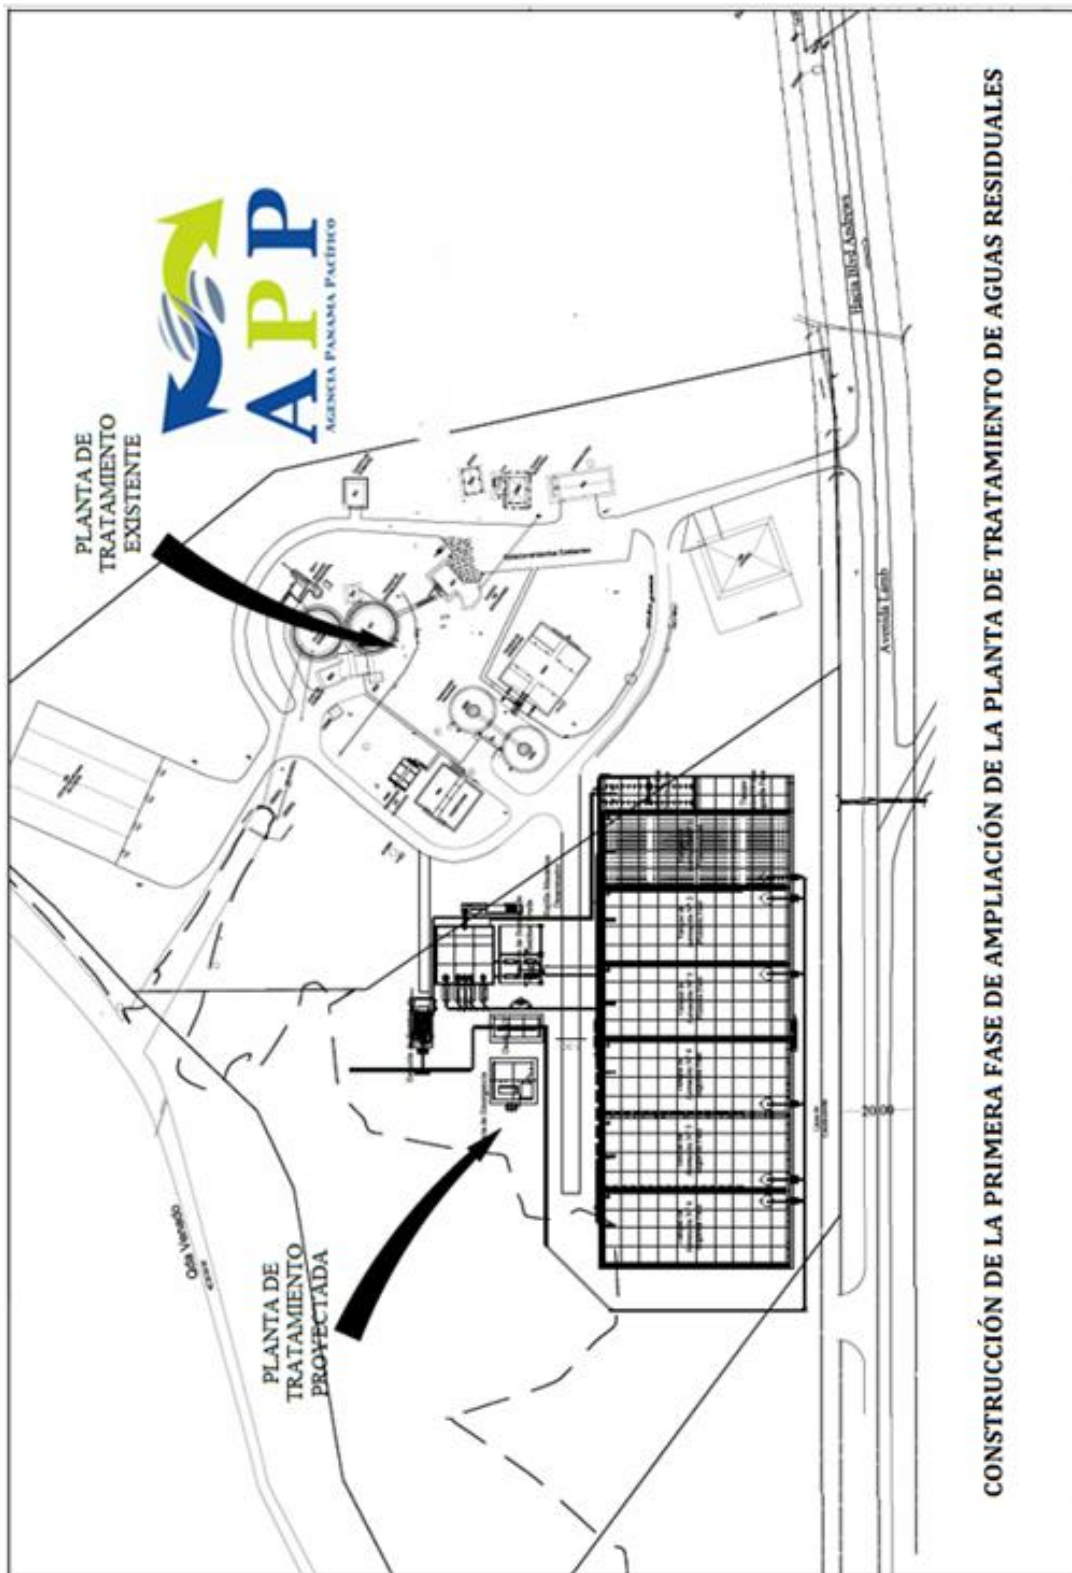

Construction of the first phase of expansion of the Wastewater Treatment Plant for the management of wastewater from the Panama Pacific Area. It includes the suitability of the site, civil works, improvement to existing pumping stations, equipment and piping. This will timely meet the estimated demands of the proposed development of the Master Development Plan. The capacity of the existing wastewater treatment plant of Panama Pacifico Special Economic Area is 1.5 MOG; by building a new treatment plant of the "Intermittent SBR reactors" type and improving the existing pumping stations; it is expected to attend on time the estimated and designed demand according to the Master Development Plan, expanding its capacity to about 5 MDG management.

Scheduled Dates:

Projected Bidding Date: March, 2017.

Projected Work Starting Date: July, 2017.

Projected Work Finish Date: January, 2019

CONSTRUCCIÓN DE LA PRIMERA FASE DE AMPLIACIÓN DE LA PLANTA DE TRATAMIENTO DE AGUAS RESIDUALES

CONSTRUCTION OF THE MAIN LINE OF DRIVING OF DRINKING WATER AND STORAGE TANK FOR THE TOWN CENTER OF THE AREA

PROJECT TYPE

DRINKING WATER SUPPLY.

PROJECT COST

B/. 20, 894,879.00

PROJECT STRUCTURE

Construction Bidding.

Project Summary

Expansion of the Drinking water System for the Panama Pacific area, in order to timely attend the estimated demand of the Master Development Plan. The current system has a water demand of approximately 2.8 MOG per day. It is estimated that at completion of the project the demand will increase as the development of the Area grows. As well it has to provide an alternative to guarantee the water supply to the area of Veracruz, the coast of Palo Seco, Playa Bonita Resort and Farfan Residential, which are connected to the system crossing through the Special Economic Area. Therefore, it is necessary to ensure the continuous supply and the quality of water required for the development of the Panama Pacific Area.

Scheduled Dates:

Projected Bidding Date: March, 2016.

Projected Work Starting Date: June, 2016.

Projected Work Finish Date: June, 2018
